

The rough crew of two dozen spice workers and their thuggish leader do not take kindly to this unexpected interruption of their smuggling operation, and give the player characters a grudging, if not openly hostile, reception on board the harvester, depending on how the player characters managed to get on board.

It is important to remember that as agents of their House, the player characters have the right to be wherever they want, and that they can assert this at any time.

If the player characters pass a challenging (D2) **Understand** test, they notice that several barrels of raw spice are marked with a crudely sprayed symbol in chalk. An additional point of Momentum provides the additional information that the symbol is a rough representation of a rival House. These barrels are to be smuggled off Arrakis for a healthy profit, all of it going to Metzos and her crew, not the player characters' own House. If the player characters confront the harvester crew with this accusation, they react by giving up Metzos and blaming her entirely, out of fear that the House's reprisal will result in their imprisonment or even execution.

PUTTING THE CLUES TOGETHER

If the player characters do not yet suspect that setting off in their 'thopter to question the 'malcontent mechanic Euler' at the distant storage depot was a wild

goose chase, the gamemaster can put them on that track by pointing out that one of the gruff Alberich crew is the very mechanic identified as the compressor saboteur by Obregon's maintenance log back on the Grief. What is he doing here on the Alberich? **Discipline** does not work on Euler but **Communicate** does.

The mechanic is surly and disrespectful when talking to the player characters, but he is telling the truth when he says that he had nothing to do with the compressor sabotage, and has never worked at the storage depot the player characters were going to. In fact, he has been working ceaselessly on this harvester for weeks, with no time for carryall maintenance duties. With a further challenging (D2) **Communicate** success, he also reveals that in fact he was assigned here by Obregon herself. Someone somewhere is lying. If the player characters have any Momentum they might use some here to Obtain Information.

If the player characters investigated their 'thopter wreck and found the cut fuel line, the gamemaster can use the pilot Jellicoe, if still present, to remind them of that second act of sabotage.

The player characters may now realize that Euler is obviously innocent of the charge of sabotaging the compressor on the Grief. They may further conclude that the true saboteur may be someone they thought of as a trusted friend.

A NOT-SO FRIENDLY FACE

Before the player characters get too involved with Metzoz' smuggling operation or any revelations about Euler not being the saboteur, a 'thopter lands outside. It is Obregon. She flew directly from the Grief the moment she picked up comm signals that the characters were alive and on the Alberich.

Obregon tells the player characters that she was 'worried' when she received no signal that they had reached the storage depot. Allow the player characters daunting (D3) **Communicate** tests to detect that she is both nervous and lying (the trait 'Friend of Obregon' will be useful here). In truth, as the real saboteur and a traitor to the characters' House, she sabotaged both the compressor and then the 'thopter to rid herself of the meddling player characters. When comms from the harvester's scout 'thopters reached the carryall with word of the player characters' survival, Obregon flew to the Alberich to deal with them personally, though at great risk to herself.

If the player characters have seen through their supposed friend's feeble story, and want to have some harsh words with her, Obregon drops the friendly act and stands unashamedly revealed as a traitor to the House, freely admitting that she was the saboteur all along and has been promised to be well rewarded, by her new patron, for damaging the hated House's spice operations. She takes cover behind the harvester crew and offers the greedy Metzoz a substantial bribe to deal with the player characters, which leads to violence between the characters, the Alberich crew and the traitor.

How this plays out is up to the gamemaster, based on the player characters' actions. If the gamemaster has Threat to spend, Obregon might have a bomb that could destroy the harvester or at least call a worm.

WORM SIGN

A great sandworm will be upon the harvester in 15–20 minutes. Any conflict brewing ceases immediately as survival becomes the pressing concern for everyone aboard the harvester. The scout 'thopter that encountered the player characters lands, along with two others who were on patrol.

Unfortunately, the carryall Grief, if signaled on the Alberich's comms, regrets that further mechanical difficulties on board mean that it will be at least an hour before they can get to the Alberich. This is the truth but is the result of commander Globus' poor management and the dreadful state of the carryall.

The harvester crew immediately ceases any hostilities toward the player characters and flies into a disorganized, panicking rabble. Most grab a few personal items and sacks of raw spice, and begin to fight over seats in the four available 'thopters—including Obregon's—

which have now landed outside. There are far too few seats in the 'thopters to fit the entire crew and the player characters. Even if they are packed with people and can just barely take off, roughly 12 people will still be left behind to face the oncoming worm.

Metzoz shows surprising courage, or greed, and chooses to stay with the Alberich, looking to the player characters to somehow save the harvester and her cargo of spice. The traitor Obregon, if she is not already immobilized, takes advantage of the confusion to disappear, either to escape or further imperil the player characters, at the gamemaster's discretion.

As the clock ticks away and the great worm draws ever closer (it will be there in three rounds) the player characters have some tough choices to make:

- ⊕ Do they offer the panicking crew valuable rewards to claim evacuation spaces on the 'thopters for themselves, or do they **Battle** (challenging, D2) the crew for seats? Or do they use **Discipline** (challenging, D2) to impose some sort of order and fairness on the panicked evacuation?
- ⊕ Do they attempt to **Move** (dire, D4) the harvester to a distant rocky outcrop and claim the relative safety of solid ground, gambling that they and the precious cargo of spice will make it there before the sandworm arrives? This is an extended test with a requirement of 10 (p.159).
- ⊕ Do they try something clever to lure the sandworm away from the harvester, using knowledge or assets they acquired in the desert, such as planting a Fremen thumper at a distance from the harvester? And do they have the means, skill, and luck to pull it off? This is an extended task with a requirement of 8 (see p.159).
- ⊕ Do they try to **Understand** (average, D1) what drew the sandworm here, and search for the concealed thumper in the landing gear of Obregon's 'thopter, activated by her to doom the player characters? A successful test reveals the thumper, causing the ground to vibrate ever so subtly near the rear landing strut.

And what of the traitor Obregon? Does she use the imminent worm situation to make good her escape in a 'thopter? If confronted, she admits to using the thumper, claiming that she planned on getting away and destroying the harvester entirely, sacrificing the crew to cover up the murder of the player characters.

Or does she take advantage of the player characters' attempts to save the harvester to attack them with her personal assets, even at the risk of losing her own life?

Does she succeed? Does she get away?

CONCLUSION

How do the player characters intend to follow up on the dreadful state of the carryall Graf Von Dreissen? Do they reprimand the terrible commander Globus? Does the chastised commander remain in place, now quite hostile to the player characters? Do they recommend that Globus be removed from his post? What then becomes of the dismissed Globus? Who does he throw his lot in with? Does the poor spice production of the Grief and its harvesters improve or continue?

How did the encounter with the Fremen end? Did they part as enemies, allies, or something in between? Was blood spilled, or were gifts given? Were the player characters effectively robbed and shamed? Is the Fremen chief Drasil now an implacable enemy, or a potential friend and ally? Either way, the Fremen do not forget their chance meeting in the desert, and soon contact the characters, wanting either revenge or a favor.

Which House was Metzos smuggling raw spice to? Do the player characters put a stop to the racket, or turn it to their own advantage?

What became of the traitor Obregon? Was she exposed by the player characters' investigations or did she choose to reveal herself? Was she captured alive, killed in a struggle, or did she escape? Will she bedevil the player characters another day, now a fugitive from her own House but with intimate knowledge of its operations and facilities?

Did she reveal the identity of her new patron? Is it an obvious suspect like a rival House, or a supposedly friendly House? Perhaps her new patron is not really from another House at all, but from a cunning third party—such as the Bene Gesserit or the Padishah Emperor himself—intent on instigating a war between the player characters' House and a rival House for their own Machiavellian reasons.

APPENDIX

Deep in the human unconscious is a pervasive need for a logical universe that makes sense. But the real universe is always one step beyond logic.

—from "The Sayings of Muad'Dib" by the Princess Irulan

CHARACTER SHEET

SKILLS

p.102

- ⊞ **Battle:** Physical conflict and strategy.
- ⊞ **Communicate:** Social tests.
- ⊞ **Discipline:** Stamina and willpower.
- ⊞ **Move:** Athletics and speed.
- ⊞ **Understand:** Mental challenges and knowledge.

DRIVES

p.105

- ⊞ **Duty:** What is your responsibility.
- ⊞ **Faith:** What your heart says.
- ⊞ **Justice:** What is right.
- ⊞ **Power:** What you want.
- ⊞ **Truth:** What the facts are.

TRAITS

p.144

- ⊞ Let you try something you couldn't do normally.
- ⊞ Make something easier to attempt (-1 Difficulty).
- ⊞ Make something harder to attempt (+1 Difficulty, or need a Skill Test when it wouldn't normally).
- ⊞ Stops you doing something that you could normally do.

DIFFICULTY LEVELS

p.146

SIMPLE (DIFFICULTY 0)

- ⊞ Nudging open a stuck door.
- ⊞ Investigating a subject of common knowledge.
- ⊞ Asking for a simple favor.

AVERAGE (DIFFICULTY 1)

- ⊞ Overcoming a simple lock.
- ⊞ Investigating private but not secret knowledge.
- ⊞ Asking for a significant favor from a friend.

CHALLENGING (DIFFICULTY 2)

- ⊞ Overcoming a complex lock.
- ⊞ Investigating confidential or hidden knowledge.
- ⊞ Asking for a favor that costs the benefactor something minor.

DAUNTING (DIFFICULTY 3)

- ⊞ Overcoming a complex lock in a hurry.
- ⊞ Investigating knowledge that has been actively hidden by a powerful faction.
- ⊞ Asking for a difficult favor from someone you already owe.

DIRE (DIFFICULTY 4)

- ⊞ Overcoming a complex lock, in a hurry, without the right tools.
- ⊞ Investigating knowledge whose very existence has been hidden.
- ⊞ Asking for a complicated or expensive favor.

EPIC (DIFFICULTY 5)

- ⊞ Overcoming a complex lock, in a hurry, without the right tools, during a battle.
- ⊞ Investigating knowledge whose very existence has been hidden for centuries.
- ⊞ Asking for a dangerous favor from a stranger.

SKILL TEST PROCEDURE

p.148-149

1. Player describes action.
2. Gamemaster decides on appropriate skill and assigns a Difficulty.
3. Player chooses a Drive statement:
 - ❖ If one is relevant, use that Drive.
 - ❖ If none are relevant use one of the remaining Drives.
 - ❖ If one conflicts or mismatches you may **challenge** or **comply** with the test.
4. Check to see if a focus can be applied (max of 1)
5. Spend Threat, Momentum, and/or Determination points to modify the test
6. Roll the dice and count successes:
 - ❖ Each die that scores the target number or below is a success.
 - ❖ A roll of 1 (or up to the skill value if using a focus) is a critical and yields two successes.
 - ❖ Each success beyond the required Difficulty earns 1 Momentum.

⊞ **Target Number** = Skill + Drive

⊞ **Dice Pool** = 2d20, max dice pool 5d20

ASSISTANCE

- ⊞ Each assistant rolls only 1d20 (Momentum cannot increase).
- ⊞ Target number is their choice of skill + Drive, Focus may be applied.

COMPLICATIONS

COMP. RANGE	DESCRIPTION	COMP. OCCUR ON...
1	Normal	20
2	Risky	19 or 20
3	Perilous	18-20
4	Precarious	17-20
5	Treacherous	16-20

Complications result on a roll of 20 on any dice.

SUCCESS AT COST

A roll may be changed to a bare success if the character suffers a complication

DETERMINATION (PLAYERS)

p.157

Determination may only be spent on a test where a Drive statement applies without conflict with the action. If a player opts to **challenge** or **comply** on a **test**, they may gain 1 Determination. Determination may be spent in the following ways, **each use costs 1 point**:

- ⊖ **Automatic 1:** On a single die.
- ⊖ **Re-roll:** Any or all dice.
- ⊖ **Declaration:** Create a new trait or change or remove an existing one.
- ⊖ **Extra Action:** Act again during a conflict.

CHALLENGING DRIVES

p.146-147

If the statement for the Drive being used **does not contradict the action** of the skill test, proceed as normal. The player may spend Determination on the test.

If the statement for the Drive being used **contradicts the action** of the skill test, a challenge has occurred. The gamemaster may offer the character a Determination point.

- ⊖ If the player refuses the Determination point, they fail the skill test with no further consequences.
- ⊖ If the player accepts the Determination point, they must **challenge** or **comply** with their Drive statement. In both cases they use the chosen Drive and make the skill test as normal, but afterwards...
 - ❑ If they **comply** they receive a complication.
 - ❑ If they **challenge** they must put a line through the Drive statement used and must change or recover it to use that Drive.

RECOVERING A DRIVE

Between adventures or in a scene where the character can come to terms with their priorities:

- ⊖ Reduce the Drive that has been crossed out by 1 (unless it is 4) and reinstate it.
- ⊖ Increase the Drive it is now equal to by 1.
- ⊖ Create a new Drive statement for any Drive rated 6 or more without one. It should relate to the action that caused the challenge.

ADDING TO THREAT

p.155

Players can add to the Threat pool in the following ways:

- ⊖ **Buying d20s:** As Momentum (1–3 Threat/Die)
- ⊖ **Ignore Complications:** (2 Threat/ complication)
- ⊖ **Escalation:** Some actions may 'escalate' a situation, giving the gamemaster 1 Threat. (1 Threat)

The gamemaster may add to Threat in the following ways:

- ⊖ **Threatening Circumstances:** The environment or circumstances of a new scene may add to threat. (1 - 2 Threat)
- ⊖ **Non-player Character Momentum:** Non-player character bonus successes add to the Threat pool, instead of Momentum. (Varies by success)

SPENDING THREAT (GM)

- ⊖ **Buying d20s** (1–3 points/die)
 - ❑ The first die costs 1 Threat.
 - ❑ The second die costs 2 Threat.
 - ❑ The third die costs 3 Threat.
- ⊖ **Increase Difficulty:** The gamemaster can choose to increase the Difficulty of a single skill test before the roll by one for every 2 Threat spent. (2 Threat)
- ⊖ **Non-player Character Threat Spends:** When a player character's action would normally add points to Threat, a non-player character performing that same action, or making the same choice, must spend an equivalent number of points of Threat.
- ⊖ **Buy off Non-player Character Complications:** The gamemaster may buy off a non-player characters' complication by spending 2 Threat. (2 Threat)
- ⊖ **Traits:** The gamemaster may change, remove, or create a trait by spending 2 Threat. (2 Threat)
- ⊖ **Environmental Effects and Narrative Changes:** The gamemaster may trigger or cause problems with the scene or environment by spending Threat. (Various)
- ⊖ **Rival House Action:** The gamemaster may spend Threat to introduce a known enemy House to the situation. (1 Threat)
- ⊖ **Determination:** Non-player characters can spend 3 Threat to effectively use a Determination point. If they gain a Determination point, they instead gain 3 Threat.

MOMENTUM USES

p.151

- ⊖ **Buying d20s** (1–3 points/die)
 - ❑ The first die costs 1 Momentum.
 - ❑ The second die costs 2 Momentum.
 - ❑ The third die costs 3 Momentum.
- ⊖ **Create a Trait** (2 points)
 - ❑ This must relate to the action the character has just attempted, and it must be something that could reasonably result from that action.
- ⊖ **Obtain Information** (1 Point/question)
 - ❑ Each point of Momentum the player spends allows them to ask the gamemaster one question about the current situation.

CONFLICT

p.162-170

Types of Conflict:

- ❖ **Personal** – Dueling (corebook, p.171).
- ❖ **Skirmish** – Multiple opponents (corebook, p.174).
- ❖ **Warfare** – Large scale conflict (corebook, p.180).
- ❖ **Espionage** – Spying (corebook p.177).
- ❖ **Intrigue** – Social conflict (corebook, p.184).

MOVING ASSETS

To move an asset from one zone to the next requires a skill test (Difficulty 2).

You may spend 2 Momentum to move an additional zone.

- ⊖ If you move an asset **subtly**, you reduce the cost to keep the initiative to 0 if you succeed.
- ⊖ If you move an asset **boldly**, then you may move one of an opposing character's assets by one zone if you succeed.
- ⊖ If you fail, you may not spend Momentum on additional movement, and one enemy may move a single asset one zone. You may not keep the initiative.

USE OF ASSETS

Common examples of ways to use an asset include:

- ⊖ Attacking an opponent with the intent of harming or defeating them (see **Attack Sequence and Resisting Defeat**, opposite).
- ⊖ Attempting to remove an opponent's asset from play.
- ⊖ Attempting to create a new trait for the scene, or a new asset for yourself or an ally.
- ⊖ Attempting to overcome an obstacle or hindrance in the environment.
- ⊖ Attempting to gain information about the situation.
- ⊖ Attempting to remove a trait or similar complication from an ally, or to aid a defeated ally.

ATTACK SEQUENCE

p.166

1. Choose your target and the asset you're using to attack.
2. Make a **Contest** skill test against your opponent. The attacker's final Difficulty increases by +1 for each defensive asset in the target's zone.
 - a. If you win the contest, then you successfully attack the enemy.
 - b. If you lose the contest, then your attack has failed, and the action ends. You may not keep the initiative after this.
3. If you successfully attacked, the results are as follows:
 - a. If the enemy is a minor non-player character or minor supporting character, then they are **defeated** immediately.
 - b. If the enemy is a notable or major non-player character, a notable supporting character, or a main player character, then defeating them is an **extended task**. Each character has an extended task track with a requirement equal to a relevant skill, which is used to track how close to defeat that character is. Each successful attack against a character scores points towards that extended task equal to 2 plus the attacking asset's Quality, and you may add +1 to this by spending 2 Momentum. A character is defeated when their track is full.
4. If you defeated an opponent, then you may spend 2 Momentum to inflict a **lasting defeat**.

RESISTING DEFEAT

All player characters, notable and major non-player/supporting characters may **resist defeat once per scene**.

- ⊖ When they do, they are simply not defeated and may continue the conflict, but are not healed in any way.
- ⊖ It costs 1 Momentum, or adds 1 to Threat, and causes you to suffer a complication.
- ⊖ The amount of Momentum, or Threat spent to Resist Defeat increases by an amount equal to the Potency of the asset used to cause that defeat.

ADVANCEMENT POINTS

p.139

GAINING ADVANCEMENT POINTS

During an adventure, you can gain advancement points with:

- ⊖ **Adversity:**
 - ❖ **Pain:** When you are defeated during conflict.
 - ❖ **Failure:** When you fail a test with a Difficulty of 3 or higher.
 - ❖ **Peril:** When the gamemaster spends 4 or more Threat at once.
- ⊖ **Ambition:** For progressing in your ambition (1–3 points gained).
- ⊖ **Impressing the Group:** For a good plan, roleplaying scene, or noteworthy contribution (limit of 1 per session for any player).

SPENDING ADVANCEMENT POINTS

- ⊖ **Skill:** 10+1/advance
- ⊖ **Focus:** 1× total Focuses
- ⊖ **Talent:** Total Talents ×3
- ⊖ **Retrain:** You may advance a skill, focus, or talent by sacrificing an ability you already have. See p.139 for details. (Various).
- ⊖ **Drives:** Can only be altered through play. See p.146-147 & p.150.

CREATING NON-PLAYER CHARACTERS

MINOR NPCs

- ☞ **Traits:** One trait as a basic description of their job or role, such as House Trooper, Servant, or Spy.
- ☞ **Drives:** Instead, use a single Drive rating, from 4–8, which is added instead of a Drive for any test. They have no Drive statements.
- ☞ **Skills:**
 - One skill ranked at 6 (the one most relevant to their job).
 - Two skills ranked at 5, and two at 4.
- ☞ **Focuses:** One focus for the skill ranked at 6.

NOTABLE NPCs

- ☞ **Traits:** One trait as a basic description of their job or role, such as Military Officer, Steward, Pilot, or Scholar. Some may also have a second trait, reflecting the character's reputation.
- ☞ **Drives:** Two Drives rated at 6 and 7. For all other Drives, they use a score of 5. They have a Drive statement for one or both of their higher-rated Drives.
- ☞ **Skills:**
 - One skill ranked at 7 (the one most relevant to their job).
 - One ranked at 6, two ranked at 5, and one at 4.
- ☞ **Focuses:** One Focus for any skill ranked at 6, and two Focuses for any skill ranked at 7.
- ☞ **Talents:** One talent, though some may have two (gamemaster's option).

MAJOR NPCs

- ☞ **Traits:** One trait each for their role and reputation. They may have a third faction trait if applicable.
- ☞ **Drives:** They have the full range of Drive scores, rated 8, 7, 6, 5, and 4, and a statement for each Drive rated at 6 or higher.
- ☞ **Skills:** Begin each skill at 4, and freely assign 11 more points. No skill may be rated at higher than 8.
- ☞ **Focuses:** Three to five focuses, as required by their concept.
- ☞ **Talents:** Two to four talents or equivalent special abilities.

NON-PLAYER CHARACTER SPECIAL ABILITIES

Instead of picking a talent a major non-player character might have, you may choose one of the following:

- ☞ **Proficiency:** When using a specific skill in a certain way, the cost to buy the first bonus d20 is 0.
- ☞ **Threatening:** When using a specific skill, or acting in a certain way, and buying additional d20s with Threat, you may re-roll a single d20.
- ☞ **Guidance:** Whenever you assist an ally in a certain way, re-roll your d20.
- ☞ **Substitution:** When making a specific skill test you may use a specific skill regardless of the one usually required.
- ☞ **Familiarity:** Whenever you attempt to perform a specific skill test, you may reduce the Difficulty by 1, to a minimum of 0.
- ☞ **Additional Threat Option:** You can gain a specific or unique benefit by spending 1 or more Threat.

STORY HOOK GENERATOR

ROLL	PLOT	GOAL	LOCATION	HAZARD	CHARACTER
1–4	Break in and steal or kidnap the...	Secret Data	Warehouse	Sardaukar Soldiers	Bashira, the head of a House Minor's security

The *Dune: Adventures in the Imperium* roleplaying game takes you into a far future beyond anything you have imagined where fear is the mind killer so be sure to keep your wits about you. Expand your game, and the power of your House with this collection of *Dune: Adventures in the Imperium* supplements and accessories.

STANDARD EDITION CORE RULEBOOK

MUH052162

A beautiful 336 page hardback full colour interior core rulebook, offering everything you need to create your own character and noble House to adventure in the Imperium. Learn to harness the spice and battle your way to power.

COLLECTOR'S EDITION CORE RULEBOOKS

House Atreides MUH052163

House Harkonnen MUH052164

House Corrino MUH052165

Show your allegiance to the most powerful Houses of the Imperium or collect the set of these three stunning special edition covers for the Core Rulebook.

PLAYER'S JOURNAL

MUH052167

An elegantly designed 160 page journal to record your character details, House and adventures everywhere from Caladan to Arrakis. Contains lined, square and blank paper beautifully rendered in matching graphics with character and House sheets.

GAMEMASTER'S TOOLKIT

MUH052168

A four panel decorated screen with 32 page booklet offering all manner of gamemaster support. The perfect way to build your story and perhaps even your legacy on the dunes of Arrakis.

ARRAKIS DICE SET

MUH052171

A beautiful set of custom dice, spot wormsign on these sand coloured dice and bring the power of the Makers to your game.

ARRAKIS MELANGE DICE SET

MUH052177

A pre-order only set of custom dice, blue as the Eyes of Ibad, see the far future and navigate the murky world of Dune with the clarity of the spice Melange.
